Education

- **Uka Tarsadia University** *2022 - 2026*
  Bachelor of Technology in Computer Science and Engineering Surat, Gujarat
  - Cumulative GPA: 7.55

Projects

- **ghdeck - GitHub Terminal Dashboard** [GitHub | Website]
  Tech Stack: Rust, Ratatui, GitHub GraphQL API, SQLite, Homebrew
  - Built a Rust terminal dashboard listing GitHub PRs and issues together, flagging conflicts and failing CI.
  - Syncs 130 items in one GraphQL query for about 18 of 5,000 hourly API points, with a SQLite cache.
- **Synq - Real-Time Video Calling App** [GitHub | Live]
  Tech Stack: Flutter, Dart, Kotlin, WebRTC, Riverpod, Freezed, Node.js, Socket.IO, Cloudflare TURN
  - Built 1:1 and group (mesh) WebRTC calling with a Node.js/Socket.IO signalling server and data-channel chat.
  - Added zero-config mDNS discovery, a Cloudflare TURN relay, unit tests and a native Kotlin mic-level meter.
- **Callback - Job Application Tracker** [Live]
  Tech Stack: React, TypeScript, Supabase, Postgres, Chrome MV3, Cloudflare Workers
  - Built a job tracker for Indian job boards: a Chrome extension clips Naukri and LinkedIn jobs into a React kanban.
  - Layered JSON-LD and site-adapter extraction with per-field telemetry, answer-learning autofill and Postgres RLS.
- **Reaktor - Chain Reaction Strategy Game** [Play Store | Website]
  Tech Stack: Flutter, Dart, Riverpod, Custom Animations
  - Developed a multiplayer strategy game supporting 2–6 players with multiple board sizes and real-time game state management using Riverpod.
  - Implemented dramatic chain burst animations with custom paint rendering and smooth particle effects for an engaging gameplay experience.
- **SecureVault - Privacy Vault App** [Play Store | Website]
  Tech Stack: Flutter, Dart, AES-256, Kotlin, Swift, Platform Channels
  - Built a vault disguised as 4 utility apps, with AES-256, PBKDF2 key derivation, a panic password and auto-lock.
  - Native Platform Channels for icon switching and iOS Screen Time, plus screenshot blocking; on Google Play.
- **Shiv Shakti Textile - E-Commerce Website** *(Developer & Maintainer)* [Live]
  Tech Stack: Next.js, React, TypeScript, Tailwind CSS, EmailJS
  - Developing a modern textile e-commerce platform using Next.js and TypeScript, featuring a responsive UI built with Tailwind CSS.
  - Integrated EmailJS to automate order placement notifications and streamline direct customer communication.

Open-source Contribution

- **Backend, Web & App Fixes for an AI Wearable** [GitHub]
  BasedHardware / Omi - 41 merged PRs across the Python backend, the React web app and the Flutter app
  - Fixed 12 bugs in the Python (FastAPI) backend, like chat seeing only 3 of a user's goals, and 15 in the React and TypeScript web app, like chat replies arriving in one block instead of streaming.
  - Shipped each fix with a regression test that fails on main, plus 12 Flutter app fixes and `omi app`, a local test harness for app webhooks in the Python CLI.
- **Map Projections & Round-Trip Accuracy** [GitHub]
  JuliaEarth / CoordRefSystems.jl - GitHub #362, #363, #364, #365, #366, #367, #369
  - Implemented the Stereographic projection across the polar, equatorial and oblique aspects, validated against PROJ to 4e-16, and registered the polar EPSG codes behind a `stereo` helper that derives the scale factor from a latitude of true scale.
  - Fixed round-trip failures across four projections, including a `DomainError` that crashed 28 of the library's 46 datums, and a cancellation near the antipode that cut the Float32 error by a factor of 50.

- **Meshing, Grid Query & Discretization Fixes** [GitHub]

  JuliaGeometry / Meshes.jl - GitHub #1409, #1412, #1413, #1414, #1416, #1417, #1419, #1421

  ◦ Fixed NaN vertices when bridging a polygon whose hole shares a vertex with the outer ring, and a geodesic grid query that returned an empty range for every box, cross-checked over 1100 random boxes.
  ◦ Implemented `discretize` for balls, cones and frusta, plus centroids for ellipsoids and unbounded geometries.

- **Live Transcription & Cache Fixes** [GitHub]

  Screenpipe - GitHub #4964, #4976, #6157, #6212, #6450

  ◦ Moved live meeting transcription off the audio ingest loop onto its own task behind a keep-latest mailbox in Rust, taking a two-minute meeting from 3,677 dropped audio frames to zero; also stabilised local Whisper language detection and fixed cache clearing that left transcripts on disk.

- **Differentiable Runtime Fixes** [GitHub]

  Pasteur Labs / tesseract-core - GitHub #796, #810, #811, #812, #814, #815

  ◦ Fixed six bugs in the Python runtime of Tesseract, a toolkit for differentiable scientific computing: gradient paths that matched the wrong field or failed on dict keys and absent optional leaves, big-endian arrays corrupted in base64 and binref encoding, and array defaults in the `abstract_eval` schema.

- **Adaptive Loss Functions & Documentation Improvements** [GitHub]

  SciML / NeuralPDE.jl - GitHub #1054, #1055, #1057

  ◦ Implemented new adaptive loss functions (`SoftAdaptAdaptiveLoss` and `ReLOBRaLoAdaptiveLoss`).
  ◦ Filled the placeholder docstrings for `PINNRepresentation` and `PhysicsInformedNN`, and updated CI badges.

- **Theme System & Dark Mode** [Docs | Website]

  TuringLang / docs - GitHub #509, #523, #602 and turinglang.github.io - GitHub #92, #93, #98

  ◦ Built theme switching for the documentation site and a dark theme with auto-detection for the main website.

Experience

- **Krtya Technologies Pvt. Ltd** *July 2024 - Dec 2024*
  Web Developer Intern Surat, Gujarat

  ◦ Tech Stack: React.js, ASP.NET Core, Blazor, MySQL, C#, REST APIs, Bootstrap
  ◦ Developed a feature-rich eCommerce website with product browsing, secure checkout, order management, and responsive UI for seamless user experience.

Skills

- **Mobile Development:** Flutter, Dart, iOS (Swift)
- **Web & Backend:** React.js, Next.js, Node.js, FastAPI, Supabase, Postgres, MySQL, REST APIs, Tailwind CSS, Astro, Quarto, HTML, CSS
- **Programming Languages:** Python, TypeScript, JavaScript, Rust, Dart, Julia
- **Design & Creative Tools:** Figma, Canva, Lightroom, DaVinci Resolve

Certifications & Achievements

- **Smart India Hackathon 2024 Finalist**

  Tech Stack: .NET, C#, WPF

  ◦ Built a Windows application (GPO Manager) to generate and manage custom Group Policy Objects aligned with CIS security benchmarks.
  ◦ Team Techolics_ selected as finalist for offline/standalone Windows GPO deployment.

- **HDFC Bank Parivartan ECSS Scholarship**

  Undergraduate Programme 2022–2023

  ◦ Awarded a merit-cum-need scholarship by HDFC Bank under its CSR initiative for undergraduate students.

Extra-Curricular Interests

- **Cinema:** Passionate about films and visual storytelling
- **Photography:** Street and landscape photography [Unsplash]
- **UI/UX Design:** Exploring modern design systems, typography, and micro-interactions

Thank You
